

Dear Dr. Glaser,

Thank you so much for coming to our classroom and teaching us about chemistry! We really appreciate all the time and preparation it took for you to come & talk with us. The kids loved it! We have a class full of students who now want to become chemists! You were such an inspiration to the kids. Thanks again!

Sincerely,
Christy Wohlbold

Dear Dad,

I really liked the presentation. I think it was great!! I had never actually seen dry ice before. How can ice be dry? I liked the liquid nitrogen because it looked very hot but it was actually very, very cold. Oh yea and thanks for the model molecule set and the science packets.

Love,

Kayla 😊

Dear Dr. Glaser,

I like how you poured liquid nitrogen onto people's hands and got on the floor and I saw steam and a little bit of liquid. I like how you put ice in the bowl and then color. That was really cool.

Sincerely

Kristy Burns

Dear Dr. Glaser,

The thing I like most was when you put the dry ice into the water. I really appreciate you coming. I learned a lot.

Love,

Jazzman

Dear Dr. Glaser

Before you came to our class I thought chemistry was boring. But you changed that. I really know now that boring is not the right word for it! I hope you can come again!
How can you make that ice?

Sincerely,

Layton

E. Weiss

ps the girl that sat
next to Kayla!

Dear Dr. Glaser,

Thank you very much for coming to show us experiments.

My favorite experiment was the volcano! I really wanted to know what would happen if you poured hot water in to it.

It was very fun.

Sincerely,

Karissa Reller

Dear Dr. Glaser,
Thank you for coming in our
class and teaching us all those
good things. My favorite
experiment was when you put
that liquid on the floor
and on our hands. IT WAS
AWESOME! I hope you come
back soon. BEY!

Sincerely,

Brenna

Dear Dr. Glaser,

I thought the liquid nitrogen was really cool when you poured it on the floor, but you poured it on our hands, when I grow up I want to be a chemist

Sincerely, Tony Clark

Dear Dr Glaser

That was the coolest thing ever.

When I'm older I want to be a chemist.

Then I do what you do. My favorite

part was when you poured the liquid

Nitrogen on my hand.

Sincerely,

Brandon

Dear Dr. Glaser,
Thank you for coming to
our class today. My favorite
experiment was pouring
the liquid nitrogen on our
hands. I hope that you come
again soon. Do you work
by a place called Child
Development Lab? Is it
fun being a chemist?

Sincerely,
Daniel

Dear Dr. Glaser,
Thank you for coming
to our class. It was
fun having you come
and show us those
cool demonstrations. I wish
I could have your
job.

Sincerely,
Manzell

Dear Dr Glaser,

I really appreciate
you being here. I liked
liquid nitrogen on our
hands. I also liked the
dry ice. Thank you for
the tube

Denise,
Hunter
